The customer dashboard is enriched with:

1. Interactive **charts** updated in real time downloadable in excel

2. Customer's costs & revenues

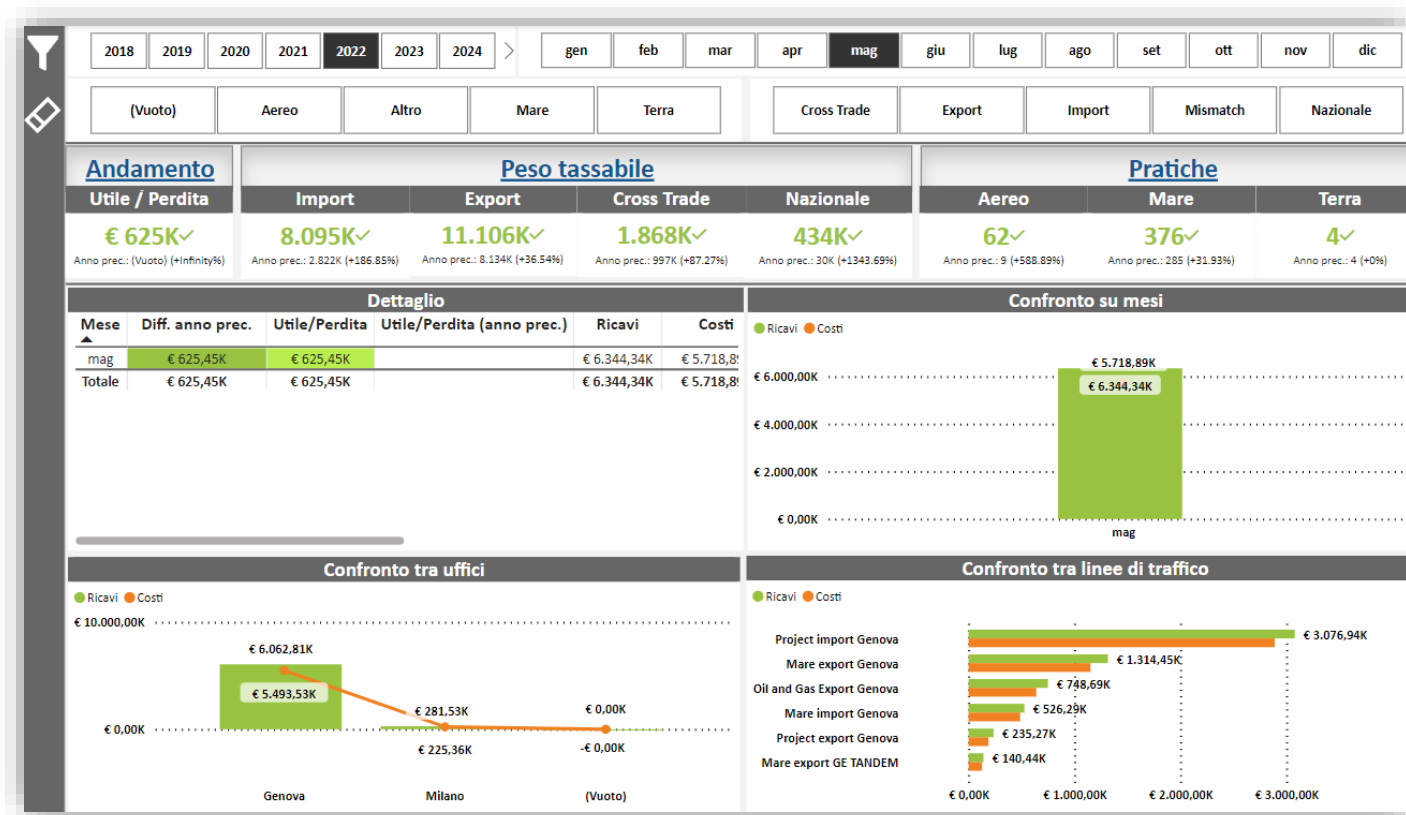

4. Full control of customer's performance

3

MasterBI

Benefits:

- ✓ **Real-time visibility and transparency of data:** essential to have up-to-date and accurate data, produce cadenced reports, streamline the Decision-making process, and respond quickly to changes.
- ✓ **Data analysis and integration, demand forecasting:** integrate data from different sources into a single intuitive dashboard, reduce time-consuming activities, immediately identify opportunities and critical issues, act promptly with appropriate measures to solve problems (problem solving)
- ✓ **Performance indicators (KPIs):** the creation of monitoring tools allows you to track performance, identify KPIs focused on specific goals, short - medium - long term. Reports produced with BI tools enable easier interpretation of key metrics, faster and more effective sharing of information with stakeholders.
- ✓ **Competitive advantage:** leveraging processed data effectively enables competitive advantage by responding more quickly to changing market conditions, reducing costs, improving customer satisfaction, and offering qualitatively superior service.

In summary, business intelligence and dashboards are key tools for supporting business decisions, optimizing processes, reducing costs, and improving overall efficiency and effectiveness

1. IN CLOUD AND EASY TO USE

The software is intuitive, easily accessed remotely, in the cloud ensuring significant savings in management and maintenance costs

2. SECURITY

Validation processes, certificates and protocols are adopted for the security of processed data

3. INTEGRABILITY

Integrable with companies' ERPs, and you can purchase individual modules or integrate them with each other according to your needs.

4. OPERATIVE EFFICIENCY

Ensures a better view of the whole process, optimization of production processes, increased productivity of activities

FREIGHT FORWARDERS & TRANSPORT

FINANCE

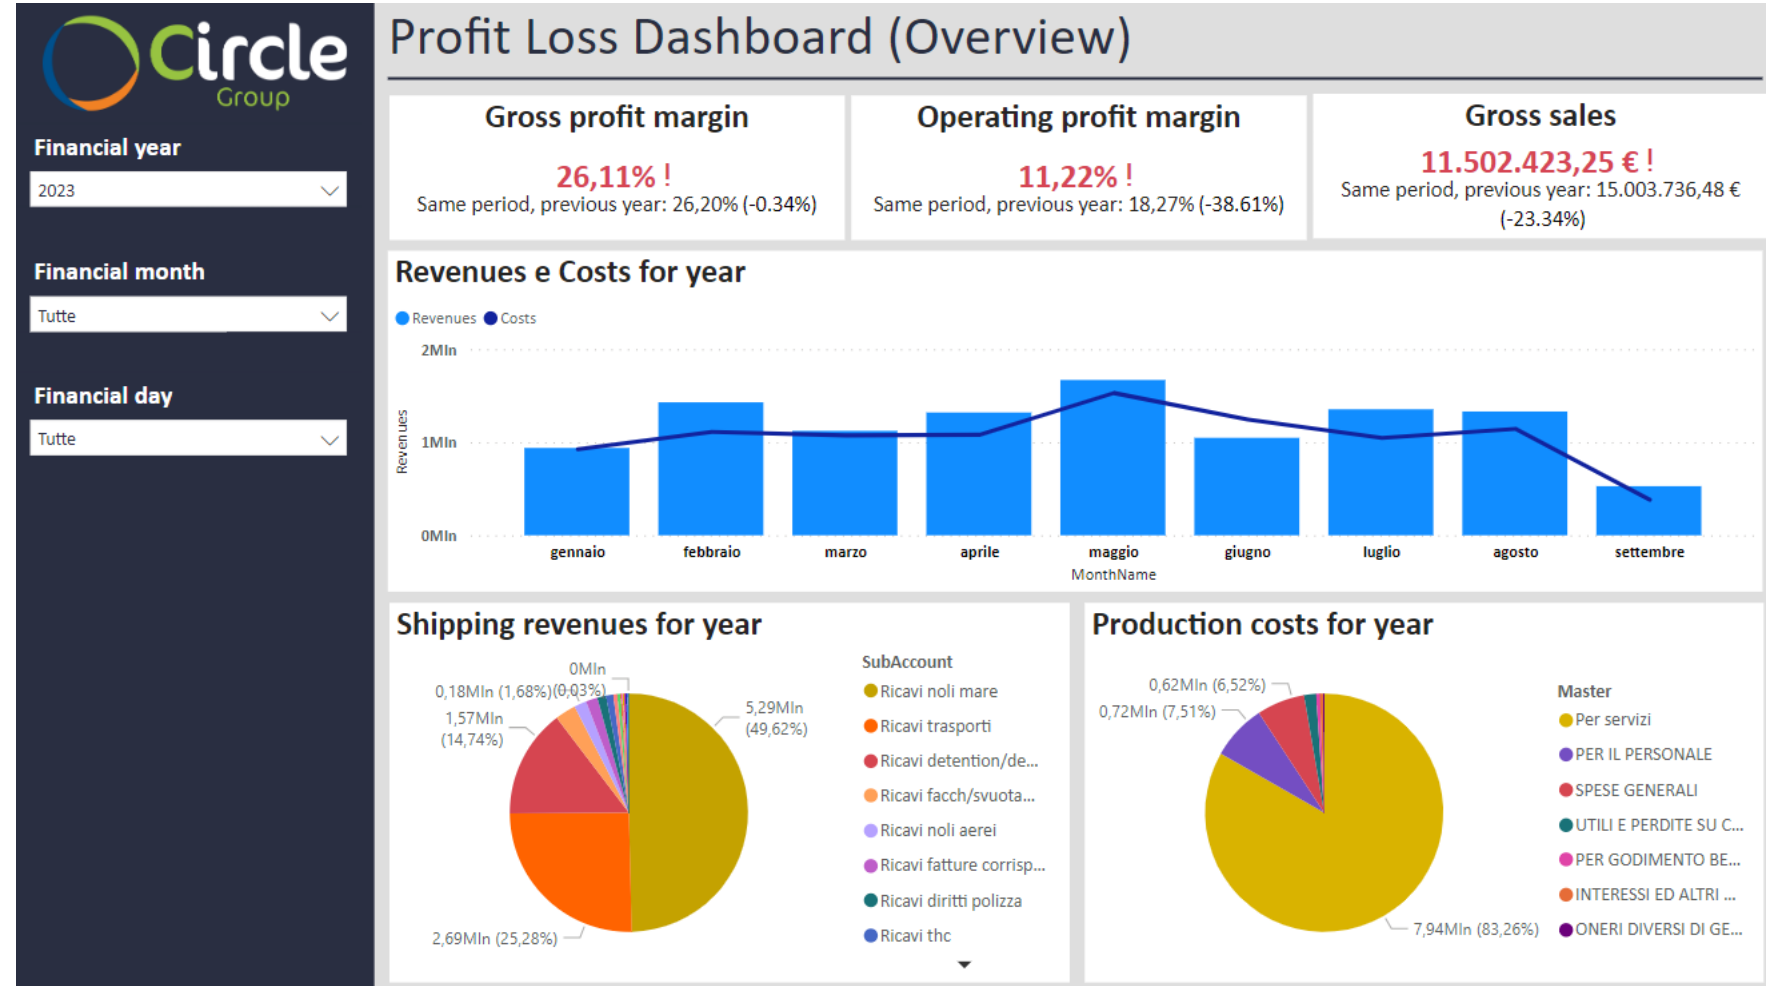

WAREHOUSE

1. Freight Forwarders & Transport

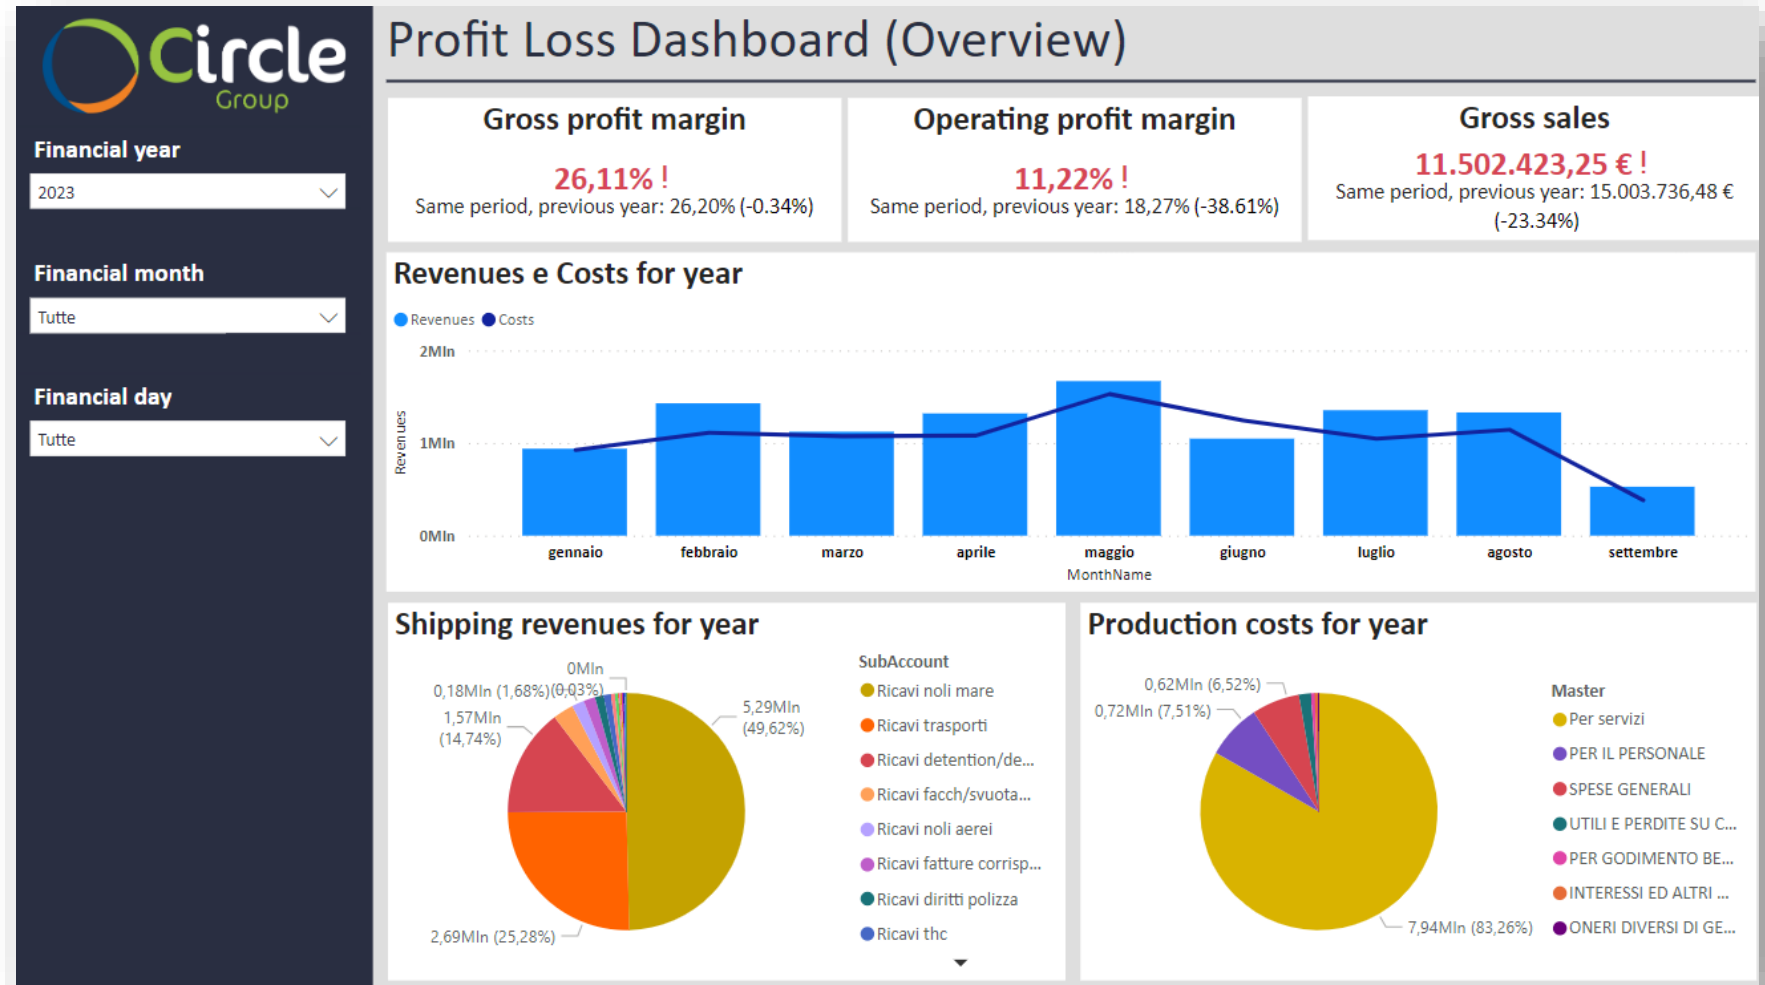

Optimizing time and cost through a Data-Driven approach to shipping is critical to making the most of resources, and using them efficiently. It is possible to:

- Monitor shipping costs, avoid overcharges, and optimize budgets
- Compare revenues and costs monthly by identifying the most productive periods
- Have complete and clear visibility of revenue generation
- Organize data, analyze performance, and identify areas for improvement

Data management in finance is important to generate detailed and clear reports, thus increasing the quality of the service offered

- Search function with filters to select only the data of interest
- Create graphs, histograms, tables by integrating data
- Export data to excel for further analysis
- Generate customized reports based on the needs of various business areas

Understanding inventory trends, inventory consumption, product turnover ratio, or inventory stock is an important activity both strategically and economically. B.I. helps in this regard to:

- Quickly identify risks/errors ensuring timely interventions
- Define stock analyses with ad hoc details
- Make rapid data-driven decisions based on objective data
- Ensure consistent services and supplies

Federative Services: Proof of Delivery & Transport eDocuments

Proof of delivery (POD) is a mobile software solution for real-time driver performance monitoring and delivery confirmation. It can be used to streamline the delivery process and speeds up back-office procedures like customer notification, claim management and invoicing. It's out-of-the-box features include GPS vehicle tracking, digital signature, custom delivery notifications, and electronic proof of delivery (ePOD) template.

Optional features include:

1. Using the Mobile App as a QR Code/Barcode scanner for load control
2. Taking pictures to populate your digital delivery note and confirming that the shipment was successful

Benefits:

- ✓ **Faster delivery execution:** by using the tablet, document handling time is reduced and the process is faster and more accurate.
- ✓ **Real-time visibility of delivery status:** possibility for the client and sender to track the progress of the shipment, receive notifications on devices, view the name and signature of those who accepted the delivery
- ✓ **Dematerialization of document processes:** elimination of paper documents reduces compilation errors, costs.

MULTIMODAL CHAIN

The CMR is a paper document (consignment note) that certifies that the shipment has been taken over for the carriage of goods by road when the place of loading and the place of delivery are in two different states.

The electronic CMR (eCMR), in addition to containing all the details of the paper consignment note, has additional features such as the possibility of attaching documents and photos and authentication by digital signature.

The use of eCMR is in line with the objectives of optimising the logistics and transport sector that are the subject of the European Mobility Package, with particular reference to Regulation (EU) 2020/1056 on electronic freight transport information (eFTI).

Italy has included within the PNRR support for companies aimed at creating 'sustainable mobility infrastructure' that envisages precisely the stable adoption of e-CMR by 2024. CMR entro il 2024.

Caratteristiche della CMR

✗ Documento Cartaceo

✗ Frequenti errori, rettifiche e rischio di perdita del documento stesso

✗ Alti costi di gestione

Caratteristiche della nuova e-CMR

✓ Documento digitale: una sorgente dati non alterabile e antifrode

✓ Un unico documento digitale accessibile in real time da tutta la supply chain

✓ Abbattimento dei costi gestionali e approccio paperless eco friendly

eCMR - benefits and actors involved

Together with **Accudire**, we participated with great pleasure and concreteness in a pilot project to **digitise the eCMR in an export process from a major Italian port**. An **interoperable system** was tested between all actors involved in the port and logistics process, **allowing information flows to be exchanged in a fully digital mode**.

In order to digitise exports by linking operators with ADM and AdSP, Circle Group and Accudire participated in the pilot project involving the Benetton Group in the port of Trieste, to develop an interoperable system between all actors in the supply chain and exchange information flows in full-digital mode.
