

PRESS RELEASE

CIRCLE GROUP: eXyond provides a leading motorway company with the “FCD metadata service – regional road traffic monitoring” for 24 months

New service based on floating car data for continuous road traffic monitoring and mobility planning support

Milan, December 17, 2025

CIRCLE Group (“CIRCLE” or the “Company”) - an Innovative SME listed on the **Euronext Growth Milan market**, heading the Group specialized in the process analysis and the development of solutions for the digitalization of the port and intermodal logistics sectors, as well as in the international consultancy on Green Deal and energy transition topics – announces that its subsidiary **eXyond** has made the new **“FCD metadata service – regional road traffic monitoring”** available to a leading motorway company **for 24 months** through the Public Administration Electronic Market (MePA).

The product, part of the “ICT Services – ICT Support and Consulting” initiative, has a flat fee of **€100,000** per two-year license, referring to a regional area, and allows the Public Administration to **access advanced data for traffic and travel time analysis in a simple, secure, and standardized manner**.

Based on anonymized **GPS-Floating Car Data (FCD)** that is fully GDPR compliant, the service provides metadata from a fleet of approximately 4 million vehicles that generate over 950 million GPS points per day. The information covers a national road network of over 100,000 km and includes motorways, state roads, major provincial roads, and urban areas. The data is updated every three minutes and segmented into 500-meter sections, allowing for near real-time analysis of travel times, average speeds, and traffic levels.

The dataset is available via API or standard exchange files and has already undergone cleaning, map-matching, and route-matching processes. It can therefore be quickly integrated into existing platforms or information systems, in compliance with the license conditions governing its areas of use.

Thanks to this service, regions, metropolitan cities, provinces, and other public bodies can continuously **monitor** traffic trends on a regional and local scale, **support** the planning of infrastructure interventions and sustainable mobility policies, **analyze** congestion and road safety phenomena, and **assess the impact** of construction sites, events, or measures on traffic flow.

The "FCD metadata service – regional road traffic monitoring" service is part of the "Connect 4 Agile Growth" industrial program and strengthens the positioning of eXyond and Circle Group in the development of advanced infomobility services and the enhancement of data for road safety, logistics, and national mobility efficiency (in line with the Connect 4 Agile Growth plan), including through the activities of **Infoblu NewGen**.

Alexio Picco, managing director of Circle Group, commented, *"The addition of the FCD metadata service is a strategic step in strengthening our role in supporting the public administration. Thanks to high-frequency, anonymized traffic data with national coverage, we enable regional and local authorities to make decisions based on objective evidence, improving safety, planning, and sustainability of mobility. For Infoblu NewGen, this is further recognition of its position as an institutional partner for traffic information services."*

This press release is available in the Investor Relations section of the website www.circlegroup.eu and www.1info.it.

Founded in Genoa in 2012, Circle S.p.A. is the Innovative SME leading Circle Group, a company listed on Euronext Growth Milan since 2018 and specialized in the analysis and development of solutions for innovation and digitalization in the port and intermodal logistics sectors, as well as in international consultancy on Green Deal and energy transition topics.

*The Group includes the software houses **Info.era**, **NEXT Freight**, **eXyond**, **Cargo Start**, the consulting firms **Magellan Circle** and **Magellan Circle Italy**, **NEXT Customs**, as well as the affiliated company **ACCUDIRE**.*

*In the field of digital innovation, the **Milos® Intelligence** platform integrates advanced technologies such as AI, simulation, and Digital Twin to support decision-making processes*

and the digitalization of systems, through solutions like the **Extended Port Community System, MasterSPED®, Milos® TOS, Milos® MTO, Milos® TFP, Milos® Global Supply Chain Visibility, and StarTracking®**.

Complementing the offering, **Federative Services (cloud-based)** enable a more efficient migration towards digital business models.

Through **Magellan Circle and Magellan Circle Italy**, the Group is active in Brussels and across Europe in **advocacy activities with the European Institutions**, supporting public bodies and companies with services in **Strategic Communication and Advocacy and EU Funding Accelerator**, with a focus on the Green Deal and energy transition.

With **Cargo Start**, specialized in technological solutions for air cargo, Circle has strengthened its offering in a strategic segment of the **Connect 4 Agile Growth** industrial plan. With **eXyond**, the Group operates in advanced **infomobility** services (InfoBlu NewGen) and telematics solutions for the logistics, transport, and insurance sectors (Kmaster).

Circle also holds a 22% stake in the innovative startup **ACCUDIRE**, which offers a collaborative platform for document management along global supply chains, starting from **e-CMR** and **e-DDT** (electronic consignment note). With **NEXT Customs**, the Group develops digital services for customs optimization, contributing to the harmonization of processes in line with the strategic directions of **Connect 4 Agile Growth**.

Circle S.p.A. has been listed on the Euronext Growth Milan market of Borsa Italiana since October 26, 2018 (alphanumeric code: CIRC; ISIN code ordinary shares: IT. 0005344996).
