

Milos•TOS

One Platform for Operations, Administration & Business for Terminals

Transform your Terminal (Inland & Port) with **Milos® TOS** — the innovative Suite designed for **Ro-Ro, Multipurpose, Container** operations.

Beyond standard physical operation management, **Milos® TOS** natively integrates administrative, commercial and customs workflows through reliable interoperability.

The Suite simplify complexity using the '**ONCE**' approach: a single data entry point that fuels real-time collaboration among all stakeholders, ensuring your terminal stays competitive in a fast-moving global market

AUTOMATION & EFFICIENCY

- Gate | Equipment | Yard Automation
- IoT integration | OCR Technology
- Management of complex operations
- Safety & Security
- Real Time Visibility

SCALABLE PORT MODULARITY

- Flexible innovative platform
- Activation single modules
- Lean, cost-effective solution
- Real Time Updates

OPTIMISATION SMART

- Data-driven decision making
- Real-time Dashboards
- KPIs & Statistics
- Precision resource planning
- instant productivity tracking

INTEROPERABILITY & COMPLIANCY

- Port (PCS) | Customs | Authorities
- Industries (ERP) | Operators
- Compliancy to EU Standard (eFTI - EDIFACT / EDIGES)
- Compliancy to EU / National Rules (e-CMR / e-CIM)

Choose a TOS that fits your DNA: combine and configure independent modules to create a bespoke solution perfectly tailored to your terminal's unique operational requirements.

Vessel Management & Real-Time Operations

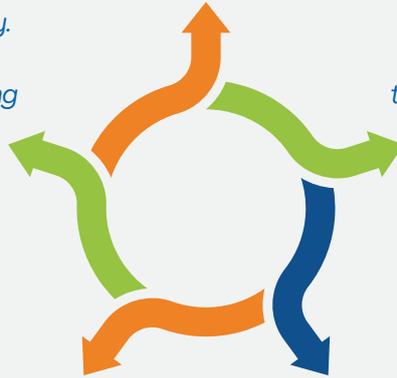

Precision management of arrivals, bookings, and stowage. Monitor loading/discharging in real-time and sync seamlessly with shipping lines for a fluid quay-side workflow.

ERP Integration & Automated Invoicing

Convert operations into revenue automatically. Direct data sync with your ERP/Accounting software ensures precise billing while eliminating manual errors and revenue leakage.

Rail Operations & Train Planning

Optimize loading plans and rail park availability. Empower ground staff with mobile apps to track wagons and update statuses directly from the tracks in real-time.

Customs Management

Full digital traceability for import/export cycles. Native connection with Port Community Systems and Customs Authorities ensures automated clearance and global compliance.

Pre-advice & Infomobility

Streamline terminal access with advanced pre-announcement and **Infoblu NewGen** integration. Deliver real-time infomobility data to synchronize truck arrivals, eliminate congestion and optimize yard handover.

WHY MILOS® TOS

All-in-One Core
One Hub for logistics, admin, and customs

Max ROI
+30-80% Revenue through full automation

Smart Innovation
Blockchain-ready with digital notarization

Total Connectivity
Full interoperability via the "ONCE" approach

Rail & Last-Mile
Precision Shunting and agile rail planning.

Smart Infomobility
Zero Congestion with Infoblu NewGen

TRUSTED BY LEADING TERMINALS
