

PRESS RELEASE

Circle Group partners with MEDLOG Italia on a logistics and warehouse digitalization project with Mastersped® WMS

The project aims to optimize operational flows, reduce processing times, and ensure interoperability across logistics processes

Milan, May 28, 2026

Circle S.p.A. (“CIRCLE” or the “Company”) - an Innovative SME listed on the **Euronext Growth Milan market**, heading the Group specialized in the process analysis and the development of solutions for the digitalisation of the port and intermodal logistics sectors, as well as in the international consultancy on Green Deal and energy transition topics – announces the launch of a project with **MEDLOG Italia**, the logistics company of the MSC Group, aimed at implementing the **Mastersped® WMS** (Warehouse Management System) solution within the LogIN Business program.

The project includes the provision, configuration, and potential development of a WMS solution designed to support the operational management of MEDLOG Italia’s warehouses, with the objective of optimizing planning, monitoring, and control activities related to workflow management, improving goods traceability, and enabling a more efficient and integrated management of logistics processes.

The introduction of MasterSPED® WMS will provide MEDLOG Italia with full real-time control of operational flows – from goods receipt to shipment preparation – as well as complete traceability of every single package throughout the supply chain.

Process automation will also accelerate end-of-period invoicing activities, while the integration of Business Intelligence tools will provide accurate data to analyze performance and promptly eliminate inefficiencies.

Lastly, the adoption of a modular and phased development approach will ensure a smooth transition to the new digital system, without disrupting daily operational continuity.

The initiative falls within the framework of NODES developments, aimed at supporting the digitalization and interoperability of systems across the logistics supply chain, and confirms Circle Group’s role as a technology partner capable of supporting logistics and intermodal

operators in the evolution of their operational processes through scalable, modular, and efficiency-oriented digital solutions.

The project will be developed through an incremental and collaborative approach, structured into several phases: preliminary analysis, detailed analysis, solution deployment, configuration and potential software development, quality assurance, and delivery into the production environment. This methodology will support MEDLOG Italia in a structured digitalization journey, ensuring progressive functional releases and constant oversight of project activities.

“The collaboration with MEDLOG Italia represents a further step in Circle Group’s growth path in support of the digital transformation of logistics,” stated **Luca Abatello, CEO of Circle Group**. *“Through Mastersped® WMS, we provide expertise and solutions developed over time to address the increasingly advanced needs of logistics operators, with the goal of making processes more efficient, traceable, and interoperable. This initiative fully aligns with the trajectory of our industrial plan ‘Connect 4 Agile Growth’, which aims to strengthen the Group’s role as an enabler of supply chain digitalization and integration among stakeholders, systems, and processes.”*

The transaction confirms the growing demand for advanced digital solutions for logistics and warehouse process management, in a context where operational efficiency, traceability, and interoperability are becoming increasingly strategic drivers for the competitiveness of industry operators.

MEDLOG

Founded in 1988, MEDLOG is a leading logistics and supply chain operator specializing in intermodal transportation solutions, inland container yard operations and value-added services. With the widest coverage in the industry, MEDLOG continuously invests in proprietary assets, such as inland logistics platforms, warehouses, trucks, locomotives, barges and cold stores. These strategically located assets enhance logistics efficiency, enabling MEDLOG to cater to complex supply chain requirements while moving towards a sustainable future. With a growing presence in more than 90 countries, MEDLOG guarantees global connectivity, tailored solutions and large off-dock storage facilities supported by expert teams and new technologies. MEDLOG is part of the MSC Group, headquartered in Geneva, Switzerland, and is privately owned.

Founded in Genoa in 2012, Circle S.p.A. is the Innovative SME leading Circle Group, a company listed on Euronext Growth Milan since 2018 and specialized in the analysis and development of solutions for

innovation and digitalization in the port and intermodal logistics sectors, as well as in international consultancy on Green Deal and energy transition topics.

The Group includes the software houses **Info.era**, **NEXT Freight**, **eXyond**, **Cargo Start**, the consulting firms **Magellan Circle and Magellan Circle Italy**, **NEXT Customs**, as well as the affiliated company **ACCUDIRE**.

In the field of digital innovation, the **Milos® Intelligence** platform integrates advanced technologies such as AI, simulation, and Digital Twin to support decision-making processes and the digitalization of systems, through solutions like the **Extended Port Community System**, **MasterSPED®**, **Milos® TOS**, **Milos® MTO**, **Milos® TFP**, **Milos® Global Supply Chain Visibility**, and **StarTracking®**.

Complementing the offering, **Federative Services (cloud-based)** enable a more efficient migration towards digital business models.

Through **Magellan Circle and Magellan Circle Italy**, the Group is active in Brussels and across Europe in **advocacy activities with the European Institutions**, supporting public bodies and companies with services in **Strategic Communication and Advocacy and EU Funding Accelerator**, with a focus on the Green Deal and energy transition.

With **Cargo Start**, specialized in technological solutions for air cargo, Circle has strengthened its offering in a strategic segment of its industrial plan. **eXyond** oversees advanced **infomobility services** (InfoBlu New Gen), focused on real-time traffic information products and services and big traffic data analytics, also for freight and logistics, as well as advanced telematics solutions for road transport (Kmaster) and Gate Automation solutions. Circle also holds a 22% stake in the innovative startup **ACCUDIRE**, which offers a collaborative platform for document management along global supply chains, starting from **e-CMR** and **e-DDT** (electronic consignment note). With **NEXT Customs**, the Group develops digital services for customs optimization, contributing to the harmonization of processes in line with the strategic directions of **Connect 4 Agile Growth**.

Circle S.p.A. has been listed on the Euronext Growth Milan market of Borsa Italiana since October 26, 2018 (alphanumeric code: CIRC; ISIN code ordinary shares: IT. 0005344996).
