

PRESS RELEASE

CIRCLE Group, in partnership with eXyond, is supporting the digital transformation of the Interporto Centro Ingrosso in Pordenone

The project makes the inbound and outbound flows at the intermodal terminal more automated, traceable, and integrated

Milan, July 13, 2026

CIRCLE Group ("CIRCLE" or the "Company") – an Innovative SME listed on the **Euronext Growth Milan** market, heading the eponymous Group specialised in process analysis and the development of solutions for the innovation and digitalisation of the port and intermodal logistics sectors, as well as in international consulting on Green Deal and energy transition matters – announces that **eXyond**, a Group company, has been selected by **Interporto Centro Ingrosso di Pordenone S.p.A.** to develop an advanced digital system for managing, monitoring, and tracking the export and transit movements of goods at the Pordenone freight village and the intermodal terminal, in accordance with the national eFTI and e-CMR standards.

The initiative concerns **Gate 3—the entrance to the intermodal terminal**—and aims to make the passage of incoming and outgoing vehicles more efficient and automated, improving visibility into operations and gradually reducing manual tasks.

The solution automatically recognizes and records vehicles and cargo units in transit—such as containers, semi-trailers, and swap bodies—collecting the information needed to verify authorizations, monitor movements, and support terminal staff in the day-to-day management of operations.

A central element of the architecture is the **GOS—Gate Operating System**—a digital platform that collects and organizes transit data, provides an up-to-date view of traffic flows, and interfaces with the terminal's existing information systems. In this way, the information collected at the gate can be shared more quickly and in a more structured manner with other operational platforms, facilitating more integrated management of the terminal.

The project also includes the implementation of advanced features for interacting with drivers via lane kiosks, badges, QR code readers, touchscreen monitors, and printers for issuing receipts and operational information, contributing to the gradual digitization of the street-side entry and exit points.

The project also enables interoperability with the eFTI (and to extend e-CMR) platforms, promoting the digitalization of transport information and connectivity with eFTI Italy, in line with evolving European regulations and the goals of improving the efficiency of the logistics and intermodal supply chain.

“Interporto Pordenone’s priority is to ensure that the intermodal terminal and the entire interport area are increasingly well-equipped with infrastructure and capable of meeting the needs of logistics operators. Our partnership with eXyond and Circle Group guarantees professionalism and the ability to equip our facility with all the innovation needed to meet the needs of industry operators.” – said Sergio Bolzonello, CEO of Interporto Centro Ingresso di Pordenone S.p.A.

“The project with Interporto Centro Ingresso di Pordenone confirms the dynamism of the intermodal network in northeastern Italy, of UIR as well as Circle Group’s role—through eXyond—in developing concrete solutions for the automation and digitization of logistics hubs. Making access points smarter and more connected means increasing efficiency, operational safety, and the ability to communicate among the various players in the logistics chain, in line with the Connect 4 Agile Growth business plan,” said Luca Abatello, CEO of Circle Group.

Founded in Genoa in 2012, Circle S.p.A. is the Innovative SME heading Circle Group, listed on Euronext Growth Milan since 2018 and specialised in process analysis and the development of solutions for the innovation and digitalisation of the port and intermodal logistics sectors, as well as in international consulting on Green Deal and energy transition matters.

The Group includes the software houses Info.era, NEXT Freight, eXyond, Cargo Start, QMap, the consulting firms Magellan Circle and Magellan Circle Italy, NEXT Customs, and the associate company ACCUDIRE.

In the field of digital innovation, the Milos® Intelligence platform integrates advanced AI, simulation and Digital Twin technologies to support decision-making processes and systems digitalisation, with solutions such as the Extended Port Community System, MasterSPED®, Milos® TOS, Milos® MTO, Milos® TFP, Milos® Global Supply Chain Visibility and StarTracking. Complementing the offer, Federated Services (cloud-based) enable a more efficient migration towards digital business models.

Through Magellan Circle and Magellan Circle Italy, the Group operates in Brussels and across Europe in advocacy activities with European Institutions, supporting public bodies and companies with Strategic Communication and Advocacy and EU Funding Accelerator services, with a focus on the Green Deal and energy transition.

With Cargo Start, specialised in technology solutions for air cargo, Circle has strengthened its offering in a segment that is strategic to the Connect 4 Agile Growth industrial plan. With eXyond, the Group is active in advanced infomobility services (InfoBluNewGen) and telematics solutions for the logistics, transport and insurance sectors (Kmaster).

Circle also holds a 20% stake in the innovative start-up ACCUDIRE, which provides a collaborative platform for document management along global supply chains, starting from e-CMR and e-DDT (electronic consignment notes). With NEXT Customs, the Group develops digital customs optimisation services, contributing to process harmonisation in line with the strategic directions of Connect 4 Agile Growth.

Circle S.p.A. has been listed on the Euronext Growth Milan market of Borsa Italiana since 26 October 2018 (alphanumeric code: CIRC; ordinary share ISIN code: IT. 0005344996).
