Development Opportunities & Goals

Distinctive Positioning versus competition

Our distinctive competitive positioning spans the entire supply chain ecosystem, delivering comprehensive solutions across multiple sectors and business types.

Strategy – Drivers & KPI

Resilient & Adaptive Supply Chain Building

AI-Driven Scenario Planning Tools

Development of tools using AI and data to simulate various disruption scenarios and analyze their potential impact on operations.

Supplier Diversification Intelligence

Providing clients with deep insights into the resilience and risk profiles of their existing supplier base.

Real-Time Alternative Route Planning

Automated systems suggest optimal transportation routes based on real-time data and predicted disruptions.

Driving Modular & Scalable Architecture

30% Improvement in Visibility

Implementation of modular systems has led to a significant increase in the End-To-End Visibility Score.

95% System Interoperability

High level of compatibility achieved with 3rd party systems to ensure seamless data flow.

25% Increase in Customer Adoption

The scalability of the architecture has directly contributed to a higher rate of customer adoption.

Compliance with EU Normative

Regulatory Adherence Support

Assisting companies in meeting strict European regulations, specifically e-CMR and Single Window requirements.

20% Faster Customs Clearance

Public private collaboration platforms have successfully reduced the time required for customs processing.

99% Privacy Compliance

The digital ecosystem guarantees data traceability and security in full alignment with privacy regulations.

Accelerating & Increasing Dematerialisation

99% Reduction in Paper Usage

Document digitization efforts have nearly eliminated paper while cutting management time by 50%.

20% to 30% Error Reduction

Simplified digital processes have significantly lowered the frequency of manual errors in transport documentation.

Exploiting AI & Business Intelligence

95% Root Cause Accuracy

Utilizing AI to identify the deep-seated reasons for supply chain delays with high precision.

70% Pre-emptive Disruption Resolution

Predictive insights allow for the resolution of the majority of supply chain disruptions before they even occur.

20% Increase in Delivery Accuracy

Collection and analysis of real time data ensure total visibility and improved delivery performance.

Strategic Positioning

Strategy – Drivers & KPI

Connect 4 Agile Growth

Scenario planning tools: Developing tools that use AI and data to simulate different disruption scenarios and their impact.

Alternative route planning: Automatically suggesting alternative transportation routes based on real-time and predicted disruptions.

Supplier diversification intelligence: Providing insights to clients on the resilience and risk of their supplier base

RESILIENT & ADAPTIVE Supply Chain Building

Compliance: support companies in adhering to European regulations (e.g., e-CMR, Single Window).

Collaboration: developed public-private collaboration platforms that have reduced customs clearance times by 20%.

Digital ecosystem that guarantees data traceability and security, with 99% compliance with privacy regulations

Compliance with EU NORMATIVE

Root Cause Analysis to identify the deep root causes of supply chain delays with 95% accuracy.

Predictive Insights to anticipate and resolve 70% of supply chain disruptions before they occur.

Precise Information: collect and analyze real-time data to ensure total visibility of goods, improving delivery accuracy by 20%.

Exploiting ARTIFICIAL INTELLIGENCE & BUSINESS INTELLIGENCE

Driving MODULAR & SCALABLE ARCHITECTURE

End-to-End Visibility Score improved by 30%)

Interoperability with 3rd party systems: 95%

Customer Adoption Rate: increased by 25%

Accelerating & Increasing DEMATERIALISATION

Document Digitization: reducing paper usage by 99% and management time by 50%

Simplified Processes: reduced manual errors in transport documentation by 20% / 30%

Global Supply Chain Visibility – Integrated Ecosystem

Linking Platforms, Driving Process for Industries

Industry Recognition

Our products inside Gartner Vendor Guide

Gartner

Supply Chain Operational Visibility Vendor Guide

Published: 2024

Analyst(s): Christian Titze, Bart De Muynck

This research provides a compendium of the operational visibility solutions categories and providers that Gartner covers. Supply chain technology leaders can use this research to help develop a comprehensive supply chain visibility technology portfolio strategy.

Our competitive edge is validated by industry-leading analysts.

Our comprehensive product portfolio has earned recognition in the prestigious Gartner Vendor Guide, positioning us among the top-tier solutions providers in the supply chain technology space.

This recognition validates our commitment to innovation and demonstrates our ability to **deliver enterprise-grade solutions** that meet the evolving needs of global supply chain leaders.

The Gartner inclusion reflects our comprehensive approach to supply chain digitization, combining advanced technology with deep industry expertise. This third-party validation strengthens our position in competitive evaluations and enhances our credibility with decision makers across multiple verticals.

))) Collaborative intermodal transport

Circle Group has developed a service that goes beyond simple regulatory compliance. The goal is to create a truly **collaborative ecosystem** that leverages digital and innovative tools to connect and add value to every player in the logistics chain (Terminal & Ports – Road Transport – Freight Forwarders & Industries), not just solving a problem, but aiming to transform the entire process into a competitive advantage for everyone. >>> **MILOS WIN WIN 9.0**

This service brings together the three key players:

- **Nodes:** optimising planning thanks to accurate advance notices, proactively managing operations and reducing wasted time. The result? A tangible increase in efficiency.
- **Road Hauliers:** avoiding unnecessary waiting times and penalties by communicating the arrival of goods in real time and ensuring full compliance with regulations. This translates into savings in time and resources.
- **Freight Forwarders / Industries:** having full control over every stage of the process. Thanks to complete traceability, they can monitor goods from the moment they leave and quickly resolve any disputes with accurate and verifiable data.

Milos Intelligence Ecosystem & AI tools

Technological pillars & core features of Circle Group ecosystem

Multi-language

Interface localised in multiple **languages** to operate globally without barriers.

Multi-Company

Centralised management of **multiple legal entities** with instant data consolidation.

Scalable

Modular architecture that integrates seamlessly, ensuring **consistent performance** at all times.

Cloud-Based

Access from anywhere via a highly reliable **native SaaS** infrastructure.

Single Sign-On

Secure single sign-on via integrated **standard protocols** (OIDC/SAML).

Onboard Cybersecurity

Built-in protection for **maximum data resilience** against cybersecurity threats.

NIS 2 Compliant

Full compliance with the requirements of the **European Directive** on risk/security management.

Microservices

Maximum **modularity** through microservices and on-demand modules.

MILOS® Intelligence - Machine Learning & AI

Road & Rail Prediction Modules

Employing predictive models and algorithms, this road transportation prediction module dynamically adjusts **projected timing** and facilitate **seamless flow management** through the node. Furthermore, it **prevents congestion**, **optimizes resource allocation** and **enhances operational efficiency**, empowering both node managements and trucking companies to deliver exceptional service.

Railway operators and logistics companies operating within the node benefit greatly from a comprehensive analysis of the projected flow of trains, which allows for the **optimization of resource allocation** and the **enhancement of operational efficiency**. These invaluable forecasts are made possible by leveraging advanced predictive models and algorithms, which are meticulously fueled by a large amount of historical data and the planned train schedule.

eXyond's infomobility business line (including Qmap): from FCD and FTD data on vehicles circulating to accurate, continuous, and nationwide mobility information. *All services are natively integrated with Circle Group products.*

INFOBLU TRAFFIC PLATFORM

WHO WE SERVE

- Public Administrations
- Road Authorities
- Mobility Operators
- Ports and Logistics Operators

Traffic Live

Real-time traffic information: traffic conditions, alerts, and contextual information (roadwork, events).

Traffic Edge

Historical analyses: origin-destination matrices, isochronous curves, route service levels.

Specialized API

Dedicated services to integrate mobility data into customers' systems and processes.

Innovation Consultancy

Specialised services to support mobility and logistics innovation , and, through the Circle Group, access to European funding.

EVERY DAY ON ITALY'S ROAD NETWORK

2 mld

Processed FCD data points, including data from ~100,000 heavy-duty vehicles

220,000 km

of roads monitored throughout the country

~400,000

speed data for 500-meter segments every 3 minutes

)))))) The EU budget (EC proposal) – Trends

Policy / Theme	Main shifts & implications
Total size / Overall envelope	A substantial increase in size especially for strategic and emerging priorities; more pressure for new “own resources” to fund this.
Structural organisation of headings / programmes	Fewer, larger headings (four major ones + special instruments). Programmes are being merged. Stronger cross-cutting funds (e.g. European Competitiveness Fund). National & Regional Partnership Plans bundle many currently separate funds (cohesion + agriculture + other shared management funds). Risks: loss of visibility for some smaller programmes; negotiations on which parts are merged will matter.
Competitiveness / Innovation / Digital / Industrial Policy	In 2028-34, a new European Competitiveness Fund (ECF) brings together many of these: digital leadership, clean transition, defence & space, bioeconomy etc . More strategic investment in fewer priority fields; more scale; faster funding expected. Also potential trade-offs: less funding for non-priority areas.
Defence, Security, Resilience	Significant increase. Specific envelope for “ resilience & security / defence & space ”. New crisis / resilience mechanisms. Stronger EU-level role in security, defence; more investment in dual-use & resilience; possibly more centralized decision-making and stricter conditionality.
Climate, Environment, Green Transition	Green transition remains central, but there will likely be negotiation about how much gets earmarked, how “do no significant harm” is applied, etc. But some observers note that in “real terms” the climate-earmarked proportion may decline or not increase as much as needed
Programme simplification & conditionality	More emphasis on partnership plans, pre-agreed reforms/investments, stricter conditionality / results orientation; simpler / harmonised rules for access If implemented, could reduce administrative burdens; but will require strong capacity in MS to plan and deliver; risk that conditionality becomes a sticking point in negotiations.

Strategic Roadmap

«Connect 4 Agile Growth»

2026 Strategy & Financials

2026 - 2027

Ongoing strategic evolution

Main Success Cases

2029 Geographical Expansion

International Activities & Projects

«CONNECT 4 AGILE GROWTH» ROADMAP

- **Strategic Objective & Expansion Model**

Global consolidation under the CONNECT 4 AGILE GROWTH roadmap via a flexible, multi-channel approach: local partnerships, direct product penetration, international trade fairs, and targeted M&A operations.

- **Middle East (MENA) & IMEC Corridor**

Priority focus on the UAE and Saudi Arabia to deploy the Milos Suite and integrated customs corridors (IFSTL). Key positioning as a primary tech partner along the India-Middle East-Europe Economic Corridor.

- **North Africa & Mediterranean (Turkey & North Africa)**

Expansion across Turkey (2026 intermodal/customs hub), Morocco, Tunisia, and Egypt through IFSTL customs platform pilot projects, with planned extension into Libya and Algeria (2027–2029).

- **Central Europe & Iberian Peninsula**

Market penetration in Germany, Poland, Romania, and Hungary / Czech Republic to boost Kmaster telematics (eXyond). Target growth in Spain and Portugal focusing on airport/air cargo solutions and e-CMR / DeCA document digitalization.
