PRESS RELEASE

CIRCLE Group at "TransLogistica Poland 2026": together with partner Telepass to drive innovation in road freight transport and intermodality

From 3 to 5 November 2026 in Warsaw, eXyond, a CIRCLE Group company, will present integrated solutions for the digitalisation of road freight transport and intermodality together with Telepass, focusing on fleet management, electronic toll services and the interoperability of information flows along the supply chain

Milan, 30 October 2026 – **CIRCLE Group** ("CIRCLE" or the "Company") - an Innovative SME listed on the Euronext Growth Milan market, heading the eponymous Group specialised in process analysis and the development of solutions for the innovation and digitalisation of the port and intermodal logistics sectors, as well as in the international consulting on Green Deal and energy transition matters – announces the participation of its subsidiary **eXyond** in **TransLogistica Poland 2026**, one of the leading trade fairs in Central and Eastern Europe dedicated to transport, logistics and the supply chain.

From 3 to 5 November 2026, at the **EXPO XXI** exhibition centre in **Warsaw**, logistics operators, freight forwarders, fleet managers and international technology providers will meet to explore the sector's key developments, with particular focus on innovation, process integration and the development of new business partnerships.

eXyond will be present at the stand of its partner **Telepass (Hall 1, Stand J10),** where the two companies will jointly present their integrated technology solutions ecosystem. Participation in the event is an opportunity to strengthen the Group's international presence and showcase an offering that combines digital transport management, electronic toll services and interoperability between systems, supporting the needs of companies and fleets operating on Europe's main routes.

Some of the most significant challenges facing road freight transport operators active in the Polish market include managing cross-border transport documentation, integrating with European electronic tolling systems and complying with national regulatory requirements, including those applicable under the **SENT** system (*System for Electronic Transport Supervision*).

Through the **PUESC** portal, the SENT system requires reporting and monitoring by the transport categories and entities identified under Polish law, with the aim of strengthening goods traceability and monitoring flows. The proper management of the required information and compliance with

applicable obligations are therefore important to reduce the risk of penalties and operational interruptions.

To address these needs, under the slogan "*From e-CMR to geolocation: Your supply chain in ONE click*", **eXyond** will present the new features of **KMaster®**, its advanced telematics and fleet management solution designed to support the digitalisation of road freight transport processes and foster interoperability with public administration information systems, including in relation to obligations managed through the **PUESC** portal.

KMaster® integrates real-time geolocation features for vehicles and drivers, mission planning and management, remote tachograph data downloads to support compliance with regulations associated with the EU Mobility Package, fuel consumption analysis and route optimisation. Through integration with Telepass solutions, which offer interoperable satellite toll services for heavy vehicles in 19 European countries, including Poland, the platform also enables fleet operations to be managed alongside electronic toll payments, helping simplify processes and improve visibility over transport activities.

During the event, other strategic topics for the development of logistics will also be explored, including KMaster®'s interoperability with intermodal logistics nodes, the digitalisation of **e-CMR** processes, the electronic consignment note for road freight transport, the MILOS® eFTI Platform in line with the European **eFTI** framework (*Electronic Freight Transport Information*) and the use of Artificial Intelligence to dematerialise and process accompanying goods documentation.

With the support of the connection through **MILOS® TFP (Transport Federative Platform)**, the federative platform developed by CIRCLE, and its focus on interoperability, KMaster® extends its capabilities beyond road freight transport, promoting more integrated management of information flows throughout the logistics chain. In this context, **Nodes Connector** functionality enables the structured exchange of information between logistics operators, terminals, ports, airports and competent authorities, according to applicable requirements and the integration needs of the different stakeholders.

The collaboration between eXyond and Telepass is part of a shared vision aimed at making transport services increasingly integrated, interoperable and accessible, combining complementary expertise to meet the needs of a sector characterised by growing operational and regulatory complexity.

"Operators transporting goods every day along Europe's main road routes need simple, integrated solutions that can support fleets even beyond individual national borders. Our collaboration with eXyond stems precisely from this need, combining our experience in European tolling with our partner's complementary technological expertise to offer more effective and comprehensive management of fleets and mobility services. Our presence in Poland, where we have been operating since 2022, makes TransLogistica Poland an important opportunity to engage with companies in the sector and demonstrate the tangible benefits of this synergy," said ***Paolo Malerba, Chief Business Revenues Officer of Telepass.***

"TransLogistica Poland is an important milestone in CIRCLE's internationalisation journey. It enables us to strengthen our presence in one of the most dynamic road freight transport markets in Europe and showcase our experience in the digitalisation and interoperability of logistics processes. The integration of our platforms with Telepass tolling solutions allows us to offer operators a technology ecosystem that provides an integrated view of activities, promoting efficiency, fleet control and the management of regulatory requirements. By connecting different systems, data and stakeholders, we aim to contribute to the development of logistics that is increasingly integrated, digital and competitive internationally," said ***Luca Abatello, CEO of CIRCLE****.*

Founded in Genoa in 2012, Circle S.p.A. is the Innovative SME heading Circle Group*, listed on Euronext Growth Milan since 2018 and specialised in process analysis and the development of solutions for the innovation and digitalisation of the port and intermodal logistics sectors, as well as in international consulting on Green Deal and energy transition matters.*
The Group includes the software houses ***Info.era, NEXT Freight, eXyond, Cargo Start, QMap****, the consulting firms* ***Magellan Circle and Magellan Circle Italy, NEXT Customs****, and the associate company* ***ACCUDIRE****.*
In the field of digital innovation, the ***Milos® Intelligence*** *platform integrates advanced AI, simulation and Digital Twin technologies to support decision-making processes and systems digitalisation, with solutions such as the* ***Extended Port Community System, MasterSPED®, Milos® TOS, Milos® MTO, Milos® TFP, Milos® Global Supply Chain Visibility and StarTracking****. Complementing the offer,* ***Federated Services (cloud-based)*** *enable a more efficient migration towards digital business models.*
Through ***Magellan Circle and Magellan Circle Italy****, the Group operates in Brussels and across Europe in advocacy activities with European Institutions, supporting public bodies and companies with* ***Strategic Communication and Advocacy*** *and* ***EU Funding Accelerator*** *services, with a focus on the Green Deal and energy transition.*
With ***Cargo Start****, specialised in technology solutions for air cargo, Circle has strengthened its offering in a segment that is strategic to the Connect 4 Agile Growth industrial plan. With* ***eXyond****, the Group is active in advanced infomobility services (InfoBluNewGen) and telematics solutions for the logistics, transport and insurance sectors (Kmaster).*
Circle also holds a 20% stake in the innovative start-up ***ACCUDIRE****, which provides a collaborative platform for document management along global supply chains, starting from e-CMR and e-DDT (electronic consignment notes). With* ***NEXT Customs****, the Group develops digital customs optimisation services, contributing to process harmonisation in line with the strategic directions of Connect 4 Agile Growth.*
Circle S.p.A. has been listed on the Euronext Growth Milan market *of Borsa Italiana since 26 October 2018 (alphanumeric code: CIRC; ordinary share ISIN code: IT 0005344996).*
